Let's Remember

Detailed Answers with Explanations and Steps

Mathematics & Statistics, Part 2, Unit 1 - Partition Values | Total questions: 12

Question 1 - Let's Remember P20

Partition values divide a distribution into

Options

- A. a required number of equal parts
- B. unequal classes only
- C. two parts only
- D. random groups

Correct answer: a required number of equal parts

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives a required number of equal parts.

Question 2 - Let's Remember P20

Quartiles divide a distribution into

Options

- A. 4 equal parts
- B. 10 equal parts
- C. 100 equal parts
- D. 2 equal parts

Correct answer: 4 equal parts

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives 4 equal parts.

Question 3 - Let's Remember P20

Deciles divide a distribution into

Options

- A. 10 equal parts
- B. 4 equal parts
- C. 100 equal parts
- D. 9 equal parts

Correct answer: 10 equal parts

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives 10 equal parts.

Question 4 - Let's Remember P20

Percentiles divide a distribution into

Options

- A. 100 equal parts
- B. 10 equal parts
- C. 99 equal parts
- D. 4 equal parts

Correct answer: 100 equal parts

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives 100 equal parts.

Question 5 - Let's Remember P20

For raw data, the position of Q_i is

Options

- A. $(i (n + 1))/(4)$
- B. $(i N)/(4) - \text{c.f.}$
- C. $(i (n + 1))/(10)$
- D. $(i (n + 1))/(100)$

Correct answer: $(i (n + 1))/(4)$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $(i (n + 1))/(4)$.

Question 6 - Let's Remember P20

For raw data, the position of D_i is

Options

- A. $(i (n + 1))/(10)$
- B. $(i (n + 1))/(4)$
- C. $(i N)/(10) - \text{c.f.}$
- D. $(i (n + 1))/(100)$

Correct answer: $(i (n + 1))/(10)$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $(i (n + 1))/(10)$.

Question 7 - Let's Remember P20

For raw data, the position of P_i is

Options

- A. $(i + 1)/(100)$
- B. $(i + 1)/(10)$
- C. $(i + 1)/(4)$
- D. $(iN)/(100) - \text{c.f.}$

Correct answer: $(i + 1)/(100)$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $(i + 1)/(100)$.

Question 8 - Let's Remember P20

For grouped data, Q_i uses the class containing

Options

- A. $(iN)/(4)$
- B. $(iN)/(10)$
- C. $(iN)/(100)$
- D. $(N)/(i)$

Correct answer: $(iN)/(4)$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $(iN)/(4)$.

Question 9 - Let's Remember P20

Approximate partition values can be determined using an

Options

- A. ogive
- B. ordinary bar chart
- C. pie chart
- D. pictograph

Correct answer: ogive

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives ogive.

Question 10 - Let's Remember P20

Which identity is correct?

Options

- A. Median = $Q_2 = D_5 = P_{50}$
- B. Median = $Q_1 = D_5$
- C. Median = $Q_3 = P_{75}$
- D. Median = $D_1 = P_{10}$

Correct answer: Median = $Q_2 = D_5 = P_{50}$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives Median = $Q_2 = D_5 = P_{50}$.

Question 11 - Let's Remember P20

The correct quartile order is

Options

- A. $Q_1 < Q_2 < Q_3$
- B. $Q_3 < Q_2 < Q_1$
- C. $Q_1 = Q_2 = Q_3$
- D. $Q_2 < Q_1 < Q_3$

Correct answer: $Q_1 < Q_2 < Q_3$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $Q_1 < Q_2 < Q_3$.

Question 12 - Let's Remember P20

The correct decile order begins

Options

- A. $D_1 < D_2 < D_3 < \dots < D_9$
- B. $D_9 < D_8 < \dots < D_1$
- C. $D_1 = D_2 = \dots = D_9$
- D. $D_1 < Q_1 < P_1$ only

Correct answer: $D_1 < D_2 < D_3 < \dots < D_9$

Explanation and steps

Apply the definition, formula or graphical rule stated in Unit 1. This gives $D_1 < D_2 < D_3 < \dots < D_9$.
